

Mesh Banner

Mesh Banner is a woven fabric with a PVC coating making it a great surface for printing on. Available in three different weaves there is a solution to suit your requirements

The perfect choice to promote your business on site.

Mesh Banner typically comes in 1.6m or 1.8m high panels/rolls. Although we can supply up to 2.4m high for custom orders

Max Flow Mesh

When the main priority is airflow over print impact. Perfect for temporary fencing specifically in high wind areas where airflow is required.

Weave Tightness (6x6)
180gsm
50% Air Flow

Mid Flow Mesh

A good balance between print impact and airflow. Versatile in its usability.

Weave Tightness (9x9)
200gsm
35% Air Flow

Print Impact Mesh

Superior print impact on the mesh. Great for permanent fences, hoardings, crowd control barriers and scaffolding.

Weave Tightness (12x12)
280gsm
30% Air Flow
